

# **EUROCHARGE PERFORMANCE**

## **TCU REMOVAL**

### **2009-2013 LAMBORGHINI GALLARDO**

#### **Tools Required:**

10mm socket wrench

Place the seats in the front and forward position

With the seats forward look at the back shelf. Gently pull the back shelf up and it will lift.

Remove the shelf and you will be looking at the fuse box as well as the TCU module. The TCU is located on the left side if facing the engine. Remove the tcu hardness by pulling the tabs to the right and left. The TCU itself is held on by 10mm bolts. Remove them and you should be able to remove the TCU.
